

BR PILOT PLANT

Litium-ion Battery Recycling Pilot Plant and
a Development and Testing Environment

About the project

BR Pilot Plant is a project which is exploring the possibility of setting up a pilot recycling plant for lithium-ion batteries and a development and testing environment (virtual pilot plant) in Ylivieska as part of the battery park. In addition, the project will provide new information on activities closely related to battery dismantling, such as battery transport, storage and other logistics issues, training needs, siting and various environmental regulations. The project is funded by the Council of Oulu Region,

POHJOIS-
POHJANMAA
COUNCIL OF OULU REGION

Objectives

- 01 The results of the project will support the decision to establish a battery recycling plant in Ylivieska.
- 02 The project will enable the emergence of a new type of industrial activity and new jobs in the area.
- 03 The Pilot Plant and the virtual factory form a significant whole in the international circular economy of lithium-ion batteries.
