

BUSINESS PARK

A DIFFERENT, BETTER BUSINESS PARK

A NEW INDUSTRIAL CONCENTRATION IN YLIVIESKA

Recion Oy that already operates in the region will be joined by new actors who will benefit from the location, machine and facility resources, raw materials as well as the synergies between actors.

BUSINESS PARK IN SHORT

- The aim is the development of the Ylivieska factory of Recion Oy and the location and development of new businesses by means of joining the R Business Park.
- Furthermore, the goal of the project is to diversify the economic structure of the region and to create new businesses and jobs as well as to promote investments in the region.
- A new regional concentration of metal industry will be created in the project. It will be located and built on the Recion owned 10 ha lot and in its immediate vicinity.
- The project will utilise, e.g., cooperation partners, educational institutions, development companies and public actors operating in the region.

RECION OY YLIVIESKA

The engineering workshop of Recion in Ylivieska has valuable knowhow and skills capital. The knowhow and experience can be transmitted to many of the businesses that will be located in the area. At the same time, this will create a subcontracting and service company network that supports the operation of Recion.

THE FUTURE OF RECION OY

The Ylivieska factory of Recion Oy will turn into a modern centre of business where entrepreneurship, knowhow and skills capital are combined in a new way to serve the needs of the future business world. Recion in Ylivieska is an efficient and functional unit. Furthermore, Recion's operation is supported by a diverse and competent cooperation network.

INDUSTRIAL PARK OF NUMEROUS OPPORTUNITIES

At the moment, a wide-ranging EU project related to battery recycling technology and battery recycling is taking place in Ylivieska. The project supports new businesses in the industry in becoming a part of the R business network. A completely new and regional circular economy park environment will be created in the project. The park will be located and built in Ylivieska.

THRIVE IN YLIVIESKA – THE TOWN OF GROWTH

Efficient business services – with "a one-stop shop principle"

RECIION OY

Recion manufactures tailor-made products and complex piping solutions for its clients. Recion is one of the longlasting and versatile pipe manufacturers in Northern Europe. We have decades of experience in hot-dip galvanizing and we provide our clients with fast delivery times for our services. The production has two separate surface treatment lines that enable high-quality galvanizing quality of pieces of different sizes and shapes.

ASME is one of our strengths. We are one of the few factories in Europe that is authorized by the American Mechanical Engineers Society (ASME). Furthermore, we are an approved manufacturer of Radiation and Nuclear Safety Authority In Finland (STUK). We are also CE certified manufacturer of metallic piping and we are licensed to manufacture hot and cold formed parts as well as welded parts for pressure equipment.

Procurements support the business by providing cost-effective knowhow for sourcing the supplier network and new opportunities, purchasing piping materials and coordinating logistics and forwarding in the supply chain. Recion has expertise both in conventional deliveries and in deliveries that meet demanding technical and safety requirements.

YLIVIESKA - CITY OF GROWTH

Ylivieska is an intersection of highways with excellent railway connections to all of Finland. The port is also close by. Jobs in the industrial sector are abundant in Ylivieska. The market area of Ylivieska consists of approximately 100 000 inhabitants.
